California Proposition 65 Statement

California Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, protects the state's drinking water sources from being contaminated with chemicals known to cause cancer, birth defects or other reproductive harm, and requires businesses to inform Californians about exposures to such chemicals.

The latest list of chemicals can be found on the California Office of Environmental Health Hazard Assessment website. A warning must be given for listed chemicals unless the exposure is low enough to pose no significant risk of cancer.

The products manufactured by Cambion Electronics Ltd may contain one or more of the listed chemicals in Proposition 65.

No need for additional safe use information beyond internal industry risk management controls. Recycle through standard metal scrap streams at end-of-life.

Consequently, Cambion Electronics Ltd is not required to label its products with a hazardous warning.
